O 2's Purpose

To provide a variety of opportunities for individuals to enjoy recreational, social and outdoor activities together in the hope of building a stronger LesBiGay Community. O^2 exists to bring people with similar interests together and to offer quality social alternatives. ***Have fun and meet new people . . . get involved!***

How O 2 Works

◆ O^2 is a member-run group in which members organize activities for their fellow members to enjoy. All activities are self funded - some are free.

◆ The types of activities members organize are only limited by their imaginations. The variety of activities is amazing! Scan the ***Table of Contents*** to see what's happening this issue. Spring and summer O^2 activities usually include camping, rollerblading, cycling, canoeing, picnics, beach volleyball, golf, gardening and so on. Generally, you don't need much experience to participate in most activities - if you have any questions about the required skill level, equipment needed, etc., don't hesitate to call the activity coordinator.

◆ You MUST be a current paid O^2 member to take part in any O^2 activity.

Membership is $10 per year (April '98 - March '99). A Membership form is included in this issue

◆ Activity planning meetings are held 6 times per year. At these meetings, volunteers brainstorm, discuss & organize future activities. Next Meeting: July 2nd, 1998 at 6:45

◆ All O^2 activities are publicized in the free bimonthly Newsletters.

O 2 Newsletters

O^2 Newsletters are available for ***Free*** at many locations in Edmonton. 600 copies are released near the first of the month, every two months. Newsletters contain the detailed information about O^2 activities, other community events and usually short stories and highlights of recent O^2 activities. We always welcome your photos and short stories.

◆ **Activity / Story Submission Deadlines:**

3 weeks prior to the release date of the next Newsletter.

Curling

If you like your sports slippery, this one's for you. It may seem an odd time to think about ice, rocks, and brooms but planning must begin now if this activity is to start in the fall. Our aim is a completely fun, totally recreational, lesbigay curling league. If you curl or want to learn in a friendly, non-competitive atmosphere, why not join us? You may enter as a team or as an individual. No experience, or even co-ordination, is needed. The fee may seem like a lot but it covers 20 weeks of curling as well as some free coaching from Donna, the club manager. There will also be access to complete "learn to curl" courses in September and October. Depending on interest, drop in rates may be arranged for occasional participants. Come out you closet curlers!

Backstreet Boyz Beaten but Bouyant

On the Easter long weekend eight members of the O2 recreational volleyball group participated in the Western Cup tournament in Calgary. This was the first time we had entered the tournament and we had a blast! The tournament, now in its 16th year, featured competition in three events: volleyball, curling and bowling. It was a large event, there were over 400 participants from Winnipeg, Regina, Saskatoon, Calgary, Edmonton, Vancouver and Seattle, and was organized by Calgary's Apollo Friends in Sport. They did a wonderful job. The sports events were efficiently run in wonderful facilities and they were accompanied by a full roster of social events. Our team, The Backstreet Boyz, came in fifth in our division. Lest you think we were a team of volleyball gods I am compelled to mention that there were only a total of six

teams; that would make us hemidemigods at best. Nevertheless, we had a lot of fun and early elimination left time for drinking beer on patios in the warm spring sun, shopping and other hardships. One member of our team, Brian Phillips, was recognized as the most gentlemanly player in our division. Congratulations Brian and well deserved! Edmontonians were represented in the volleyball and bowling events but not in the curling competition. This is a queer situation that needs to be remedied. To this end there is interest in organizing an O2 curling league in the fall.

WaterPark Follies

OK, OK, 11 AM on a Sunday morning - for us Saturday night party animals (or party animal wannabe's), this is quite a stretch, but sometimes you've just got to make a sacrifice in the name of attaining heights in great recreational pursuits! And a Sunday outing at the World Waterpark was definitely worth a little sleep deprivation. For myself, it has been over ten years since I ventured into the wonderful world of rushing water and spine-tingling slide rides, and, on this go-around, I was pleasantly reminded how much fun I was missing!

We were a stalwart party of 10 adventurers, ready to let loose, scream, splash and have the best time one could possibly have. Our guide, Wes (who knows the layout of the park, intimately), provided us with the benefits of a vastly reduced admission price as well as free tubes to make our sliding adventure even faster and smoother than we ever possibly imagined! As a group, we started out doing the California thing - riding the waves - it's tricky business as you always want to jump up at the right time so the wave catches you and carries you back for a rollicking ride: if you don't jump up at the right time, then you "miss" your ride. But, with a little coaching from Charlene, my "sea-faring" buddy, even this land-lubber was able to catch a few waves. I like the way the fog horn blows every time a new set of waves is about to begin.

After riding waves for a while, we proceeded on to the river raft adventure (this is where our bright yellow tubes came in very handy) - all ten of us linked like a train, holding hands, riding, sliding, down the extremely curvaceous river only to be drenched by a waterfall that rivals Niagara at the bottom of the river. Great Fun, a great chance to hoot and holler and have some "good clean fun." Next onto the slides!

This is when we all get to test our cardiovascular metal! As we ascended, ever higher, the intricate arrangement of staircases, we soon found that our stalwart team became separated into two factions: smokers (favoring the slides commencing at lower levels) and the non-smokers (who are also NOT afraid of heights). When we finally got to the top (after some requisite huffing & puffing), I took delight in noting how the people down at the bottom looked like ants, and also that we were at the same height as the bungy jumpers! The procedure for embarking on a slide is controlled by electronic red & green singles - so as to avoid nasty accidents with fellow sliders, as well, there's a human traffic controller at the top of each slide to keep us safe and happy at all times. The moment of truth is when the light turns green and you jump on your tube for the rapid descent to the bottom. This is the part where you can SCREAM YOUR HEAD OFF as much as you want, and nobody cares (I love it!) - some of the slides are completely enclosed (like a tube), and have portions that are completely dark (with a string of twinkling lights to give the illusion of stars in outerspace) - this can be fun, but a little scary, too! Then, SPLASH, your 45 second ride is over and your safely at the bottom, feeling cleaner and more exhilarated than you ever thought possible! LET'S GO AGAIN! Is the common cry heard at this point in time - but there is that long climb back to the top and the lineup to stand in before getting on the slide! It reminds me a lot of downhill skiing - go down fast, come up slow.

The piece de resistance had to be a slide called the "Sky Screamer" (appropriately named, as Charlene, will tell you!) - This is the tallest, highest and meanest looking slide in the joint (same height as the bungy jumper) and starts at a 90 degree angle before leveling off at the bottom for a very rapid splash - the ride is scary, but very fast - maybe, maybe, next time, when I go down, I'll keep my eyes open!
As a recent participant in various O-2 activities, I'd say the Waterpark Adventure rates a definite 10!
Be sure to catch the waves on our next trip out! - *Peter Kozak & Charlene Scott*
